

**General  
Information**

**ZETA TOUGH** Pallets are designed to be cost-effective for an ever-changing market. This has been achieved by making them lightweight without compromising their strength and durability.

**ZETA** Pallets are manufactured with galvanized steel ASTM A653, are lightest in their segment (**22.8kg/50.3lbs**), can be accessed from all the 4 sides, are **temperature and moisture resistant, rust proof, clean, durable, non-flammable** and **fully recyclable**.

**Design/  
Dimensions  
(+/- 2 mm)****Load Bearing  
Capacity**

Admissible Dynamic Load: up to **2000kg/4400lbs**

Admissible Static Load: up to **6500kg/14450lbs**

Thanks to customization friendly design, **ZETA TOUGH** pallets has further sub-variants for different loading condition requirements.

**ZETA TOUGH** Pallets are suitable for **stacking** (if the shipment is not load sensitive) and both **selective** as well as **drive-in racking**.
